

Tussentijds opvolgingsformulier Bachelorproef 2017-2018

Bachelorproef: Utilize Docker container and Selenium Grid technology to improve resource efficiency in the runtime of a Software Deployment & Testing Framework (SDTF).

Bedrijf: VASCO Data Security

Student: Arno Willaert

Promotor: Phaedra Degreef

Bedrijfspromotor: Christopher Forbes

Opleiding: Electronica-ICT: netwerken systemen en security

Periode (weeknr. volgens agenda): 9

Gerealiseerd vorige week:

Put some content in my thesis, mainly about containers and the problems I faced related to Internet Explorer

Doelstellingen voor de volgende week:

- Investigate the feasibility of running the webadmin test suite in parallel
 - Meaning, firefox and chrome in parallel
- Document how to go about implementing this
- Write the problem statement and the goals chapters in my thesis
